Business Intelligence and Competitive Analysis

Demand Analytics

Inventory Analytics

Supply Chain Analytics

Oct 8, 2021

Pranay Reddy Patlolla

has successfully completed the online, non-credit Specialization

Supply Chain Analytics

In this Specialization, learners developed essential skills to discover and solve business problems related to supply chain management via data analytics, including, business intelligence and competitive analysis, demand analytics, inventory analytics, and distribution and logistics strategies. The Specialization also provides a broad overview on job opportunities and intelligence, sourcing and order management, sales and operations planning, and transportation management. In each course, learners completed a real-life data-driven project to practice the skills learned.

Yao Zhao, PhD, Professor in Supply Chain Management, Co-Director of Rutgers Supply Chain Analytics Lab, Founding Co-Director of the Master of Supply Chain Analytics Program @ Rutgers Business School. Rutgers - the State University of New Jersey. USA.
